SUPERSESSION INFO

MITM9T61474 is being superseded to MITM9T64973 which does not have an Earth (E/B-) terminal. The grounding connection is obtained by the contact surface between the starter and the flywheel housing. Please clean this surface contact prior to installation. When you install the new starter in place of the old starter, please remove or insulate the ground cable to avoid any risk of contact with the positive terminal. The E-terminal starter and non-E-terminal starters are interchangeable.
